

blackbelt[®]360 Grade

Consistent, defensible device grading at any scale

Blackbelt360 Grade turns diagnostic results into a consistent, repeatable grade - to your own standard or to global standards - across smartphones, tablets and computers. Built for refurbishers, resellers, retailers, ITADs and 3PLs, it takes the guesswork out of grading and protects the value of every device you process.

Grading from the diagnostics

Autograding logic turns test results straight into a grade. No separate inspection, nothing left to opinion.

Your standard or global standards

Configurable grade profiles grade to your own scheme or to recognised global standards.

Consistency at scale

The same grade every time, across sites, operators and shifts.

Defensible records

Every grade tied to the device's test record and certificate - a full history if a grade is ever questioned.

DEVICE COVERAGE

Smartphones, tablets and computers (Windows PC, Mac and Chromebook).
