DataWipe

for Mobile

Certified, secure data erasure for smartphones and tablets

Blackbelt360 DataWipe for Mobile permanently erases data from smartphones and tablets at scale and speed - generating a verifiable certificate for every device and the audit trail to prove it. Built for refurbishers, resellers, retailers, ITADs and 3PLs, it's certified data erasure you can stand behind.

Erase at scale and speed

Wipe many devices at once from a single station, clearing backlogs and getting stock to market faster.

iOS Secure Wipe

Secure Enclave key destruction renders stored data cryptographically irrecoverable, with a fresh, signed iOS build installed before the device reboots to setup.

A certificate for every device

Every erasure produces a verifiable certificate, stored centrally and exportable for compliance, audit and customer assurance.

Compliance built in

ADISA certified data erasure, NIST 800-88 compliant, and supporting GDPR, R2v3 and ISO 27001.

DEVICE COVERAGE

Smartphones and tablets, including iPad and Android tablets.
