

blackbelt[®]360 Diagnostics for Mobile

Fast, accurate diagnostics and automated grading for smartphones and tablets

Blackbelt360 Diagnostics for Mobile runs a full hardware test on every smartphone and tablet, grades it automatically, and produces the records to prove it. Built for refurbishers, resellers, retailers, ITADs and 3PLs, it cuts returns, keeps grading consistent, and gets you optimum value on every device.

Comprehensive testing

52+ tests on iOS and 43+ on Android - screen, battery health, cameras, Face/Touch ID, connectivity and the full sensor set.

Automated grading

Autograding logic turns results into a consistent, repeatable grade and takes the guesswork out of inspection.

Cloud and security checks

Activation Lock/FMIP, blacklist and IMEI, carrier and lock status via iCloud, GSMA and MDM integrations.

Records you can audit

Detailed repair records and test certificates, emailable from the interface, for a complete history on every device.

DEVICE COVERAGE

Smartphones and tablets, including iPad and Android tablets.
