

Compliance & Accreditations

At Blackbelt360, we make software you can trust.

Blackbelt360 software is independently certified and tested to leading international standards for data security and erasure:

ADISA Certification, which provides independent, globally recognised accreditation for various companies offering IT Asset Disposal and secure data erasure services.

Blackbelt360's data erasure conforms to the requirements of NIST Special Publication 800-88, verified through ADISA testing.

Achieving ISO 27001 ISM means that devices processed using Blackbelt360 software adhere to the highest standards of data security, risk management, and compliance.

ISO 9001 is a set of Quality Management Systems standards that recognise organisations whose products or services keep within statutory and regulatory requirements.

Compliance with industry erasure standards

NAID AAA (i-SIGMA), R2v3 (SERI) and e-Stewards set the data sanitisation requirements that certified refurbishers, recyclers and ITAD operators must meet. Blackbelt360's data erasure meets these requirements, so certified organisations can use Blackbelt360 to satisfy the data sanitisation element of their certification.

R2v3 is SERI's global certification standard for the ITAD industry. Blackbelt360's data erasure meets the data sanitisation requirements of R2v3, supporting certified operators' compliance.

NAID AAA is i-SIGMA's certification for secure data destruction service providers. Blackbelt360's data erasure meets the requirements NAID AAA-certified operators must satisfy.

e-Stewards is the certification standard for responsible electronics recyclers. Blackbelt360's data erasure meets the data sanitisation requirements e-Stewards-certified operators must meet.

Regulatory compliance

GDPR (General Data Protection Regulation) ensures that businesses and organisations safeguard the processing and movement of all EU and UK citizens' personal data.

NIS (Networks and Information Systems) is European Union cyber security legislation setting standards of NIS security across the EU's critical infrastructure.

Partners & Memberships

Blackbelt360 is an active member of leading industry associations across the device-lifecycle, refurbishment and recycling sectors.

i-SIGMA is the industry trade association for secure data destruction and records & information management service providers.

The GSMA (Global System for Mobile Communications Association) is an industry organisation representing the interests of mobile network operators worldwide.

RIOS promotes responsible operating standards across the recycling and recovery industry. Blackbelt360 is a member.

CTIA[®] represents the U.S. wireless communications industry and the companies throughout the mobile ecosystem that enable consumers to lead a 21st Century connected life.

Circular Connect brings together organisations advancing the circular economy for technology and electronics. Blackbelt360 is a member.

The ASCDI is a US-based international non-profit representing businesses that reuse, repair, refurbish, resell, and responsibly dispose of technology, while promoting ethical, environmentally responsible, and data-safe practices.

The Global ITAD Alliance (GIA) brings together organisations across the ITAD value chain to strengthen and represent the industry on a global scale.
